

Master of Science Program in Translational Medicine

Institute of Medicine, Suranaree University of Technology

To combine disciplines, resources, expertise, and techniques within benchside, bedside and community pillars to promote enhancements in prevention, diagnosis, and therapies.

To expedite the discovery of new diagnostic tools and treatments by using a multi-disciplinary, highly collaborative, "bench-to-bedside" approach. Within public health, translational medicine is focused on ensuring that proven strategies for disease treatment and prevention are actually implemented within the community.
